

¿Qué es el calendario de estacionalidad?

El calendario de estacionalidad es un servicio del SIMM en donde se ofrece información sobre el comportamiento de las frutas y hortalizas que se comercializan en el Cenada durante cada año.

El calendario de estacionalidad indica como las luces del semáforo los meses donde los precios tienden a aumentar o bajar en el CENADA.

El Índice estacional de Precios del 2018, se obtiene a través de una serie histórica de datos de precios mayoristas dados en el CENADA, los cuales indican el comportamiento tradicional en un período de años determinado. Normalmente se utiliza una serie de datos de 8 años (en este caso del 2010 al 2017) para realizar los cálculos de los índices.

En cada uno de los meses se indica el porcentaje de acercamiento al precio promedio anual esperado. Por ejemplo, un porcentaje (-) indica que el precio está por debajo del precio promedio anual, o sea, que el precio en ese mes está más bajo en relación a otros meses. Contrariamente un porcentaje (+) indica que el precio de ese mes está por encima del precio promedio anual esperado.

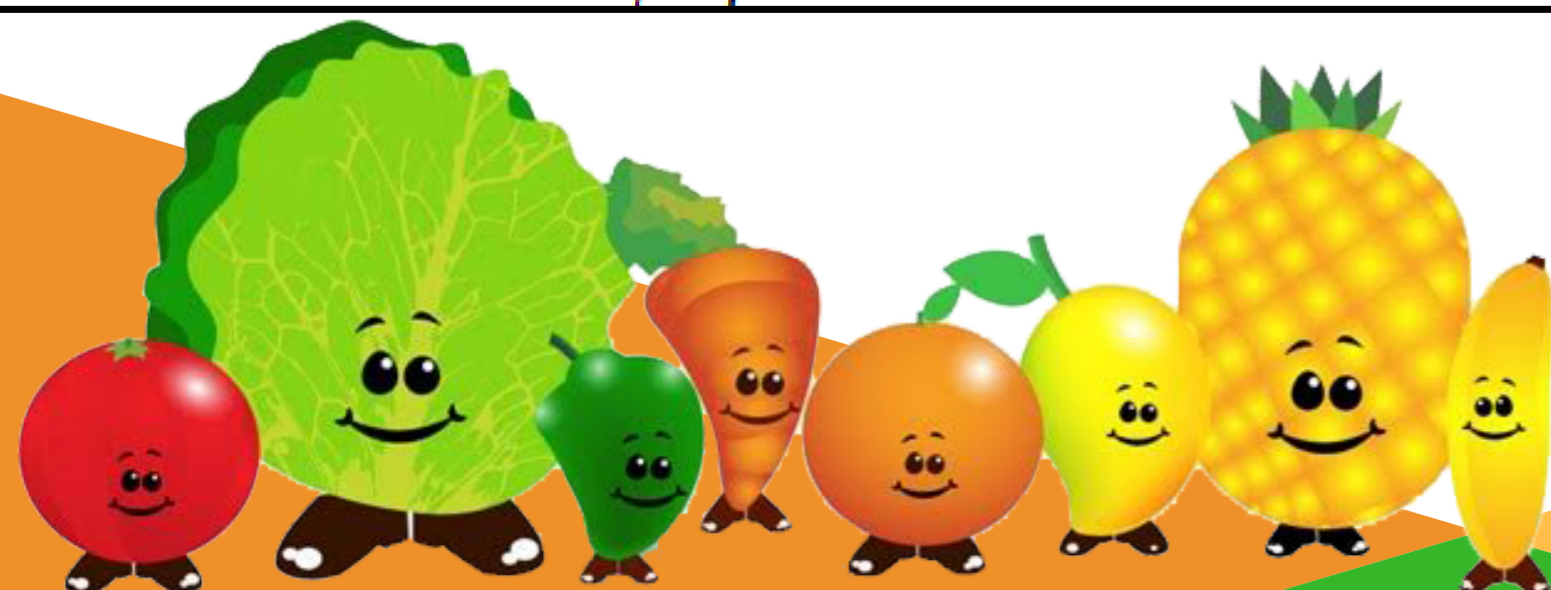

Calendario de Estacionalidad Hortalizas 2018

| HORTALIZAS | Ene | Feb | Mar | Abr | May | Jun | Jul | Ago | Set | Oct | Nov | Dic |
